Assignment1215

Problem 1

符号执行

```
//@ require true
//@ ensure 1 * 1 <= n < (1 + 1) * (1 + 1)
x = n;
//@ generated x = n && true
1 = 0;
//@ generated x = n \&\& 1 = 0 \&\& true
r = n + 1;
//@ generated x = n && 1 = 0 && r = n + 1 && true
//@ inv l * l <= n < r * r && l + 1 <= r && x == n
while (1 + 1 < r) do {
//@ generated 1 * 1 <= n < r * r && 1 + 1 <= r && x == n && 1 + 1 < r
mid = (1 + r) / 2;
//@ generated 1 * 1 <= n < r * r && 1 + 1 <= r && x == n && 1 + 1 < r && mid = (1 + r) / 2
if (x < mid * mid)</pre>
//@ generated 1 * 1 <= n < r * r && 1 + 1 <= r && x == n && 1 + 1 < r && mid = (1 + r) / 2 && x < mid * mid
    r = mid
//@ generated exists r', 1 * 1 <= n < r' * r' && 1 + 1 <= r' && x == n && 1 + 1 < r' && mid = (1 + r') / 2 && x < mid *
mid \&\& r = mid
    }
         //@ generated 1 * 1 <= n < r * r && 1 + 1 <= r && x == n && 1 + 1 < r && mid = (1 + r) / 2 && x >= mid * mid
         1 = mid
           //@ generated exists l', l' * l' <= n < r * r && l' + 1 <= r && x == n && l' + 1 < r && mid = (l' + r) / 2 && x >= n & x == n & 
//@ target l * l <= n < r * r && l + 1 <= r && x == n
}
 //@ generated 1 * 1 <= n < r * r && 1 + 1 <= r && x == n && 1 + 1 >= r
```

验证条件

```
x = n \&\& l = 0 \&\& r = n + 1 \&\& true \mid -- l * l <= n < r * r \&\& l + 1 <= r \&\& x == n
```

```
exists r', l * l <= n < r' * r' && l + l <= r' && x == n && l + l < r' && mid = (l + r') / 2 && x < mid * mid && r = mid \//
exists l', l' * l' <= n < r * r && l' + l <= r && x == n && l' + l < r && mid = (l' + r) / 2 && x >= mid * mid && l = mid |-- l * l <= n < r * r && l + l <= r && x == n
```

```
l * l <= n < r * r && l + 1 <= r && x == n && l + 1 >= r | -- l * l <= n < (l + 1) * (l + 1)
```

Problem 2

符号执行

```
//@ require sll(x)
//@ ensure sll(x)

t = x;

//@generated sll(x) && t = x

//@inv sllseg(x,t) * sll(t)
while (t != 0) do {
    //@generate t!=0 && sllseg(x,t) * sll(t)
    //@derived sllseg(x,t) * store(t, u) * store(t + 8, q) * sll(q)
    t = * (t + 8)
    //@generate sllseg(x,t') * store(t', u) * store(t' + 8, q) * sll(q) && q = t
    //@target sllseg(x,t) * sll(t)
}
//@generated sllseg(x,t) * sll(t) && t = 0
```

验证条件

```
sll(x) && t = x \mid -- sllseg(x,t) * sll(t)
sllseg(x,t') * store(t', u) * store(t' + 8, q) * sll(q) && q = t \mid -- sllseg(x,t) * sll(t)
sllseg(x,t) * sll(t) && t = 0 \mid -- sll(x)
```
